

DELAWARE BIRD RECORDS COMMITTEE - SUMMARY OF COMPLETED REVIEWS

January 1, 2011

The following is a summary of all of the rare bird records that have been reviewed by the Delaware Bird Records Committee since it was reorganized in 1995. Included are records of birds no longer on the Delaware Review List - they are signified by **'bold black'** species names, whereas Review Species are identified by **'bold red'** type. The records in 'black' type were accepted and the records in 'blue' type were not accepted by the Committee. Specimens have not been reviewed by the committee but were verified by for the publication of 'Birds of Delaware'. Subspecies of common species that have been reviewed are listed under the subspecies common name and Latin name and recorded in the taxonomic sequence for the species. Archival documentation are reports put together based on the historical record; data for these reports was usually obtained from the files maintained at the Museum of Natural History where the DBRC files are also stored. If you are interested in more details on any of these records, contact Frank Rohrbacher, Secretary of the DBRC, 5 Neva Court, Wilmington DE 19810 (ROHRBAF@AOL.com).
